PROJECT MANAGER — HEALTHCARE SOFTWARE IMPLEMENTATION

SUMMARY

Project management professional actively leading a healthcare technology capstone project (CarePath) from stakeholder validation through delivery, combined with 8+ years of experience in high-volume, customer-facing service roles. Skilled at stakeholder management, cross-functional team coordination, requirements gathering, project scope definition, and translating end-user needs into working software delivered against a fixed deadline. Comfortable presenting to leadership, training end users on new systems, and managing multiple priorities in fast-paced, detail-critical environments. Bringing a builder's mindset and hands-on healthcare project delivery experience to a Project Manager role supporting software go-lives, on-site training, and long-term customer success — including regular travel.

CORE SKILLS

Project Scope & Milestone Planning | Stakeholder Management & Requirements Gathering | Cross-Functional Team Leadership | Healthcare Software Delivery | Leadership Presentations & Communication

End-User Training & Go-Live Support | Risk & Issue Resolution | Agile / Iterative Delivery | Documentation (Scope Statements, Project Plans) | Scheduling & Follow-Up

Confidentiality & Compliance | Microsoft Office & GitHub Project Boards | CRM-Style Workflows | Fast Learner on New Systems | Team Collaboration

PROFESSIONAL EXPERIENCE

Project Manager — CarePath (Capstone Project) **Jul 2026 – Present**
Atlas School | Builders+Backers Mobility Cohort *Tulsa, OK*

- Lead a 3-person cross-functional team (backend, frontend/design) building a healthcare transportation-coordination platform connecting patients, drivers, and care coordinators, against a fixed August 2026 demo deadline.
- Conducted and synthesized 15 stakeholder validation interviews across clinical staff (RNs, CNAs), home health caregivers, NEMT operators, and clinic operations leaders, converting 13 strong validated signals into product requirements and feature priorities.
- Authored the project's full scope statement — defining project boundaries, in-scope/out-of-scope decisions with justification, constraints, assumptions, impacted business processes, and internal/external stakeholder interfaces.
- Built and maintain a weekly, milestone-gated project schedule with pass/fail gate criteria, a GitHub project board for cross-functional task tracking, and a PR review process to keep delivery on track.
- Coordinate backend and frontend workstreams to keep API contracts, data models, and UI requirements aligned across teammates.
- Preparing the go-live/demo-day narrative and leadership-facing presentation translating stakeholder validation evidence and product functionality into a clear delivery story.

Founder & Lead Operator **2024 – Present**
Balentine Tech Solutions *Tulsa, OK*

- Founded and operate a customer-focused business, managing client communication, project intake, follow-up, and day-to-day operations.
- Build and maintain professional relationships through timely communication, responsiveness, and strong customer service.
- Manage multiple priorities at once while staying organized, dependable, and detail-oriented.
- Represent the business professionally in networking and client-facing environments.

Appointment Scheduler

Aspen Dental

Oct 2023 – Oct 2024

Tulsa, OK

- Managed high-volume inbound scheduling and coordinated logistics across staff and customers in a fast-paced service environment — comparable to coordinating installation and training schedules across stakeholders.
- Recognized as a Top Performer in February 2024 and April 2024 for production, quality, and customer interaction.
- Used active listening, professionalism, and consultative communication to guide customers through scheduling decisions.
- Handled customer questions, concerns, and schedule changes while maintaining accuracy and a positive experience.

Customer Service Representative

Black Hills Energy

Aug 2017 – Feb 2023

Fayetteville, AR

- Assisted residential and commercial customers with account questions, service concerns, billing issues, and problem resolution — parallel to supporting end users through a software go-live.
- Communicated professionally while managing difficult conversations and de-escalating concerns, directly applicable to supporting staff through organizational change.
- Maintained quality assurance scores above department standards through accuracy, accountability, and service focus.
- Protected sensitive customer information and followed company procedures, reflecting the confidentiality standards required in healthcare environments.

Merchandise Pickup Associate

Walmart

Apr 2015 – Aug 2017

Bentonville, AR

- Delivered front-line customer service in a busy retail environment focused on order pickup, issue resolution, and customer satisfaction.
- Coordinated with team members to maintain accuracy, efficiency, and a positive customer experience.

EDUCATION

Computer Science — Full-Stack Web Development

Expected Graduation: August 2026

Atlas School | Tulsa, OK

Capstone Project: CarePath — healthcare transportation coordination platform (Project Manager)

ADDITIONAL EXPERIENCE & RECOGNITION

- Builders+Backers Idea Accelerator — Participant
- OKSBDC — Business development advising
- Gradient — Member, Tulsa innovation workspace
- Atlas School — Featured in institutional marketing

TECHNOLOGY / TOOLS

Microsoft Office Suite | Google Workspace | GitHub & Project Boards | Scheduling Systems | CRM-Style Workflows | Email & Calendar Tools | Data Tracking & Reporting Support | Working technical fluency with REST APIs and PostgreSQL/Prisma data models gained through direct collaboration with engineering teammates on CarePath
